MARTIN PAUL CREATIVE CENTER INCREASES IT LIST OF AVAILABLE RACKS

March 2, 2009

Displays by Martin Paul, Inc., has 35 different types of display racks designed to fit your needs. There are racks designed to hold the small energy drink cans, as well as racks for the very large beer cans. We have a variety of racks designed to hold snack products like cheese sticks, individually packaged pickles, to bottles of condiments like catsup, mayo, mustard... We also have a selection of hooks for hanging products, even some that will work on glass. Our latest innovative rack is the shelf extender that will hook right into the store's existing gondola racks, without tools.

We take pride in our products. You will find that all of our racks are proudly branded with our Martin Paul Inc., logo, phone number and patent number. We have our own manufacturing facility in Denton, Texas. Our racks are all made from a very durable plastic material called PET. The raw materials we use in our manufacturing process all come with material certifications. We do not have the concern of material contaminated with lead that other companies do.

We are continually designing new display products to showcase your items. If you don't see what you need, call us we are always open to new ideas and will do what we can to help you.
